This is alert you while having an informal lunch with M.S. McGee, she mentioned that she, Robin Gaskins and a woman that died of lung disease (probably Ms. Meenach/Trick from Mary's description) all had the same job as liquid compounders. M.S. McGee took over the job from the woman who died and when Mary Sue transferred out of that job, Robin took the job from Mary Sue.

This is the first time I was aware that 3 individuals who have been diagnosed with a serious lung problem have been in the same job class. Suggest we discuss this with Glenn Ingraham at our next staff meeting and I'll take a look at the PFT's to see if there is anything going on there.
